Education

University of Science, VNU-HCM (HCMUS)

Sept 2022 – Present

B.Sc. in Computer Science

Major: Artificial Intelligence and Computer Vision

- GPA: 3.6/4
- Relevant Coursework: Machine Learning, Deep Learning, Computer Vision, Digital Image Processing, Computer Graphics, Probability & Statistics, IoT, Software Engineering, Multivariate Statistic Analysis, Big Data.

Le Hong Phong High School for the Gifted

Sept 2019 – June 2022

Specialized Class in Mathematics

Technical Skills

Programming Languages: Python, C++, C, C#, JavaScript, HTML, CSS.

Frameworks & Libraries: PyTorch, TensorFlow, Scikit-learn, Keras, Pandas, YOLO, OpenCV, Vision Transformers, Generative Adversarial Networks (GAN).

Technologies & tools Git, Bash, SQL, Docker, Linux, Jupyter Notebook, Google Colab, Kaggle.

Languages Skills: English fluent

Projects

GitHub profile: github.com/BAoD1nH

Human Activity Recognition model via Video, based on LSTM + ResNet50

- Developed a video-based activity recognition pipeline using ResNet50 for feature extraction and LSTM for time-series modeling. Achieved 81.2% accuracy on the UCF dataset after fine-tuning hyperparameters.

Handwritings Classification based on Vision Transformers

- Design a model from scratch based on Vision Transformer (ViT) framework, train and test on dataset CIFAR-10, achieving 86.3% accuracy with optimizer AdamW, GELU, CosineAnnealingLR, and data augmentation.

Smart Door Lock System integration with Face Recognition AI Model

- Building a Door Lock device, integrated with Face Recognition camera whose model transfer learning from MobileNetV2. Achieving 80% acc inference in real time, remote control via web or FaceID.

Other Projects: AI Chatbot, Image Generation GAN Model, Multi-agent "Hide and Seek" Game, Vehicle & Animal Classification ANN, Image Compression with K-means, AI-Assisted Productivity Web.

Research Interest

Deep Learning (Transformers, LSTM), Computer Graphics (3D Reconstruction, AR, VR), Computer Vision (Detection, Recognition), Robotics, Mathematics & Algorithm Design, etc.

Certificates & Courses

Unsupervised Learning, Recommenders, Reinforcement Learning (Stanford University), Coursera - Oct, 2025

Supervised Machine Learning: Regression and Classification (Stanford University), Coursera - Dec, 2024.

Social Activities

Active in extracurricular activities, including: Core Member of the Student Activities Board, member of Google Developer Student Club (GDSC), content writers for the University Media Department.
